FOAM CONTROL AGENT

A silicone-based defoamer emulsion designed to weaken the structural integrity of bubbles, making it impossible for foaming problems to occur. As little as one ounce per 5 gallons of recovery tank capacity can prevent costly equipment damage and decrease the time spent emptying recovery tanks. Safe and effective in hard or soft water, acid solutions, alkaline, or other areas where foam is a problem. Safe on hard surfaces to create a silicone shield, increasing lubricity which allows objects to slide more easily.
